LinkedIn | Portfolio

PROFESSIONAL SUMMARY

Senior Lead Technical Writer with 11+ years of experience owning technical documentation, including API, SDK, developer, integration, and product documentation, across enterprise AI, FinTech, mortgage technology, SaaS, cloud, and DevOps platforms. Lead documentation strategy, information architecture (IA), technical reviews, and release readiness in partnership with engineering, architecture, product, and QA teams. Implement docs-as-code and AI-assisted documentation workflows using Git, Markdown, Python, large language models (LLMs), and automated quality checks.

CORE COMPETENCIES

Documentation Strategy | Technical Content Strategy | Technical Writing Leadership | API Documentation | SDK Documentation | Developer Documentation | Information Architecture (IA) | Documentation Lifecycle Management | Content Governance | Docs-as-Code | Documentation Quality Assurance | CI/CD for Documentation | Release Documentation | Technical Editing | Developer Experience | Generative AI | Agentic AI | Retrieval-Augmented Generation (RAG) | Prompt Engineering | Cross-Functional Collaboration | Stakeholder Management | Agile/Scrum | Team Mentoring | Process Improvement | Release Management

TECHNICAL SKILLS

API and Developer Documentation: REST APIs, OpenAPI/Swagger, Postman, API References, SDK Guides, Developer Portals, API Authentication, Error Handling, JSON, YAML, JSONLint

Documentation Platforms and Authoring: MkDocs, Docusaurus, MadCap Flare, Adobe FrameMaker, DITA XML, Markdown/MDX, Confluence, GitHub Pages

Docs-as-Code and CI/CD: Git, GitHub, GitHub Actions, Jenkins, Python, VS Code, Documentation Build and Deployment Automation

Documentation Quality and Governance: Vale, CSpell, markdownlint, Lychee, Acrolinx, Microsoft Writing Style Guide, Content Validation, Automated Link Checking, Documentation Quality Assurance

AI and Automation: Generative AI, Large Language Models (LLMs), Agentic AI, Retrieval-Augmented Generation (RAG), Natural Language Processing (NLP), Prompt Engineering, LLM Prompt Templates, AI-Assisted Documentation Workflows, GitHub API

Collaboration and Delivery: Jira, Confluence, Figma, Agile/Scrum, Software Development Life Cycle (SDLC), Stakeholder Management

Technical Domains: Enterprise AI, FinTech, Mortgage Technology, SaaS, Cloud Platforms, Kubernetes, Docker, DevOps, IoT, Cybersecurity, Databases

AI AUTOMATION PROJECTS

AI-Powered Documentation Sanitization and Quality Automation

Technologies: Python, Markdown, Git, VS Code, LLMs

Implemented a Python-assisted documentation sanitization workflow with spelling, terminology, broken-link, and editorial style checks. Extended the validation approach toward batch processing and incorporated Git-based review of proposed content changes.

Local Documentation Preview Workflow

Technologies: MkDocs, Python, Git, VS Code

Architected and implemented a Windows-based local documentation preview workflow, enabling writers to validate content changes before committing to the repository. Reduced repeated staging, build, and deployment cycles and improved correction-cycle efficiency.

Documentation CI/CD Pipeline

Technologies: GitHub Actions, Vale, CSpell, markdownlint, Lychee, MkDocs

Architected and implemented a docs-as-code CI/CD pipeline with version-controlled Markdown content, automated editorial and technical validation, strict build checks, and continuous deployment to GitHub Pages.

LLM-Based Connector Documentation Restructuring

Technologies: Python, GitHub API, Markdown, LLMs

Implemented template-driven documentation transformation using LLM prompts and Python processing, with GitHub-based content retrieval and output workflows. Designed additional Snowflake ingestion and Mintlify publishing stages with backup and review checkpoints.

WORK EXPERIENCE

Senior Lead Technical Writer

Kore.ai Software India Pvt Ltd | Jan 2025 – Present | Hyderabad, India

- **Enterprise AI Documentation Strategy and Leadership:** Led technical documentation for six enterprise AI product lines, including AI for Procurement and Agent Platform, using a docs-as-code workflow (Git, Markdown, MkDocs, CI/CD publishing) that cut average publish turnaround from 3 days to under 1 day.
- **Local previews:** Introduced local MkDocs previews, eliminating repeated stage commit, build, and deploy cycles and cutting correction-cycle time by up to 50% per writer.
- **Content Analytics and Discoverability:** Increased click-through rate on top content by 11% (Jun 2025 – Oct 2026) across the AI for Procurement and Agent Platform docs sites by instrumenting analytics and acting on stakeholder feedback.
- **Documentation Quality Assurance:** Reduced post-release documentation defects by 35% and saved approximately 2 hours of review time per document through automated link, style, spelling, and build checks.
- **Documentation Release Management:** Delivered 55+ releases across six AI product lines with a 97% on-time rate.
- **Team leadership:** Manage four technical writers, building team capability in Information Architecture (IA), docs-as-code principles, MkDocs, and process documentation.
- **Documentation Standards and Governance:** Trained the team on Vale linting against the Microsoft Manual of Style for Technical Publications (MSTP) and CSpell, strengthening consistency and improving overall documentation efficiency.

Specialist Technical Writer

Fiserv India Pvt Ltd | Jun 2022 – Nov 2024 | Noida, India

- **Content strategy:** Redesigned information architecture across documentation sites, knowledge articles, and developer portals, improving consistency, user experience, and discoverability by 25%.
- **API governance and testing:** Led documentation governance for error handling, authorization, and cross-referencing. Validated API behavior in Postman through 500-series error testing and a daily issue log. Reduced API-related support tickets by 10%, shortened partner integration time, and escalated 12 confirmed defects to engineering with reproducible steps.
- **Docs-as-Code Implementation:** Introduced and owned a docs-as-code documentation management system to reduce publication time through stronger version control, review tracking, and source repository management. Used link-checking tools and Postman API testing to maintain documentation quality.
- **Agile Delivery and Team Leadership:** Led the India technical writing Scrum for 2 writers, delivering 31 sprints on time, and partnered with the US team on roadmap planning. Mentored writers in writing, editing, and documentation practices, and organized workshops and demos.
- **Cross-functional collaboration:** Coordinated hackathons, interconnect sessions, workshops, and knowledge-sharing initiatives to strengthen communication across teams.

Technical Writer
ICE Mortgage Technology India Pvt Ltd | Oct 2020 – Jun 2022 | Pune, India

- **Documentation ownership and usability:** Owned user guides, API references, SDK guides, FAQs, and release notes for eight products. Incorporated usability testing and user feedback into large-scale projects to help reduce support queries and improve satisfaction while meeting delivery schedules.
- **Documentation Standards and Governance:** Authored the team's technical writing style guide, standardizing terminology and tone across 3 writers and reducing review rework by 30%.
- **Build and Deployment Automation:** Maintained Jenkins build jobs for documentation deployment, reducing dependency on the DevOps team and speeding up 3 releases per quarter.

Senior Technical Writer
Agiliad Technologies (XebiaLabs) | Jan 2020 – Oct 2020 | Pune, India

- **Cloud and DevOps documentation:** Built a deep understanding of cloud services, DevOps, and microservice architecture, translating complex product information into clear, developer-focused content.
- **End-to-End Documentation Delivery:** Independently managed 4 concurrent documentation projects from research through publication, partnering directly with engineering stakeholders.
- **Technical Editing and Quality Assurance:** Reviewed about 10 documents per release and provided feedback on clarity, technical accuracy, grammar, and style. Reduced post-review corrections by 12%.

Senior Technical Writer
Cyient Limited | Jun 2018 – Nov 2019 | Hyderabad, India

Technical Author
AAE | Oct 2017 – May 2018

Technical Author
AAA | Jul 2013 – Aug 2015

CERTIFICATIONS

- Advanced Technical Writing
- The Art of API Documentation
- GitHub for Technical Writers
- Prompt Engineering – AI Tools
- Agentic AI Workflow
- CBAP Certification
- Learning Python
- Complete Guide to Cybersecurity
- SQL Essential Training

AWARDS AND RECOGNITION

- **Global Spotlight Award** (Kore.ai, 2025): Recognized for global impact on the AI for Procurement product line; received an award and promotion.
- **Living Proof Recognition** (Fiserv, 2023): Recognized for outstanding commitment to API governance; received a cash award.
- **Most Valuable Performer** (Cyient, 2019): Awarded for consistently exceeding expectations and driving team success.

EDUCATION

Bachelor of Science (B.Sc.) | Bundelkhand University
